Science and Art – Explore science while creating art! Use water paints to explore evaporation, use shaving cream to investigate color mixing, and pound some flowers to make beautiful art that you can put in a frame you decorate.

In the Garden – Go on a garden scavenger hunt! Classify plants, see how plant parts work, dissect a flower, and investigate insects and bugs. You can also visit the fossil dig!

Food Webs – What’s for dinner? Try out these hands-on activities that explore food chains and food webs.
